Summary

Software Engineer and Full Stack Developer experienced in building scalable web applications and ERP systems across frontend and backend. Skilled in React.js, TypeScript, JavaScript, Python, FastAPI, Django, SQL, and REST APIs, with hands-on experience in API integration, database optimization, authentication, and client-focused software delivery.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, JSX, Vite, Responsive Web Design

Backend: FastAPI, Django, Node.js, NestJS, REST APIs, API Development, JWT Authentication, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite

Software Engineering: Data Structures Algorithms, Object-Oriented Programming, Database Design

Tools Technologies: Git, GitHub, Docker, Celery, Postman, VS Code

Experience

Karmacts Systems

June 2026 – current

Software Developer Engineer Trainee

Pune, Maharastra

- Developed and maintained full-stack ERP applications, contributing to both frontend and backend development across multiple business workflows and projects.
- Built React.js and TypeScript frontend modules, including voucher management and reusable component-based interfaces for ERP applications.
- Implemented and supported job card workflows for KeshFashion, managing process flows across multiple stages.
- Worked concurrently across 3 projects, collaborating with clients to understand requirements, explain features, resolve issues, and deliver production-ready solutions on time.

Stealth Startup

Jan 2026 – June 2026

BackEnd Developer Intern

Bengaluru, Karnataka

- Built backend services and REST APIs using Python and FastAPI, increasing API throughput by 30% under peak load.
- Optimized PostgreSQL queries and database indexing, reducing execution time by 35% across critical endpoints.
- Designed data models supporting 5K+ daily records and implemented asynchronous workflows using Celery and Redis, reducing background processing time by 40%.
- Collaborated on API integration, testing, debugging, and deployment using Git and Docker, improving efficiency.

Projects

Hyperlocal Rental Marketplace | *React.js, TypeScript, Python, FastAPI, PostgreSQL, Redis, Docker*

[Link](#)

- Built and integrated REST APIs supporting 10K+ requests per day, implementing efficient request handling and seamless frontend-backend communication.
- Implemented secure JWT authentication with Redis-based token management, improving session security and reducing unauthorized access attempts by 45%.
- Designed and optimized PostgreSQL database schemas and indexes, reducing query latency by 35% and improving application performance.
- Containerized the application using Docker, maintaining a scalable service architecture.

E-Commerce Platform – Great Kart | *Python, Django, MySQL, Bootstrap, Razorpay API*

[Link](#)

- Implemented responsive frontend interfaces for product listings, shopping cart operations, and order management within a multi-user environment.
- Developed backend business logic and integrated RESTful APIs to support product, cart, checkout, and order lifecycle workflows.
- Integrated Razorpay payment gateway with real-time payment and webhook handling for reliable transactions.
- Optimized MySQL database queries and Django ORM operations using indexing and query optimization techniques, improving database performance by 40%.

Education

Walchand Institute of Technology, Solapur

Nov 2022 – June 2026

Bachelor of Electronics and Telecommunication (AIML) – 8.45

Solapur, Maharastra
